

Register Elsevier ClinicalKey or ScienceDirect for Article Citation Linking Solver

2021-05-11

The CyberTools link resolver, Solver, can now be used at Elsevier for article citation linking when Elsevier does not have the article's full text. There are no additional fees at this time for this functionality either by Elsevier or CyberTools when Solver is selected. The CyberTools instructions are at Staff Functions (3-8)-> Solver->Registration & Test URLs-> Register Elsevier databases ClinicalKey or ScienceDirect for Article Citation Linking via CyberTools. Here's an example:

Register Elsevier databases ClinicalKey or ScienceDirect for Article Citation Linking via CyberTools

Complete the "Email Us" form at [ClinicalKey](#) or [ScienceDirect](#).

Subject = OpenURL linking

Your question = Please setup outbound OpenURL linking for my resources. My link resolver base is

https://cybertoolsforlibraries.com/cgi-bin/CyberHTML?MyLibraryIdAtCyberToolsLINK&url_ver=Z39.88-2004&DB=ELSEVIER&

Please note that the above Query String value is an example. Your library's value will be different and unique to your library. Your [Registration & Test URLs] page will show your correct value.

MyLibraryIdAtCyberTools will change for your library.
